

## Club Electro

**Beat, 10-2008**

Such a nice little fellow hasn't been around here for a long time. But the cover of Club Electro isn't the only special thing about it. The content of the sample- and loop-library from Ueberschall knows how to convince, too. 28 construction-kits, loaded with punchy leads, basslines, drums and sequences are waiting for their show in every club or electro production à la Mr. Oizo.  
In a nutshell: One of the best releases this year.
