

Liquid Horn Section

PC & Musik, Juni 2006

<http://www.pc-und-musik.de>

(...)

Sounds:

A soundbank separate into staccato and legato with the categories „high“, „mid“ and „low intensity“. In there you'll find folders like „Coolphunk“, „Harlem“ or „Groovemaster“ and they even keep what they promise. Each phrase is served with the classical orchestra (saxophone, trambone, trumpet, and so on). Besides that the library also includes an extra section with chords, swells and extra notes. The whole material is perfectly recorded and sound like the above named bands (Tower of Power, Earth, Wind & Fire, and others).

Conclusion:

Blow my hat off! This Horn Section is, thanks to the Liquid Player and the first class quality of the samples, miles ahead of any mere mortal library. Funk- and soulproducers without their own horns should buy this one immediately.
