Conclusion

For all who wish for a virtuosic sax player Liquid Saxophone is a must-have.

Ueberschall has created an unrivaled Sample-Loop Player of a new generation. The licks sound clean, dry but still warm and lively. The Menu is very structured and userfriendly: You will quickly reach your goal.

Thanks to the Melodyne-Engine you don't have to worry about artefacts or limitations of the sound-modulation. The single notes within are separated and can be manipulated within a wide range without sounding unnaturally. There are no almost no limitations to your musicality.

There shouldn't be any other samplebased library out there which gives you the flexibility and authentic sound as Liquid Saxophone.
